

Seamlessly Synchronize your Corporate Directory with your Smartphones, Outlook or Office365

CorpSync is a web-based technology that integrates with your firm's Active Directory, Client Relationship Manager, or any SQL source database.

Then CorpSync will automatically push new or updated corporate contacts to Outlook and all mobile devices that sync with MS Exchange. Subscribed users will no longer have to manually add or delete firm contacts in their Outlook or mobile devices.

Mass Message Employees or Clients

CorpSync allows you to send Mass text messages, emails or text to voice messages to targeted contacts in case of an emergency, or for marketing or event planning purposes.

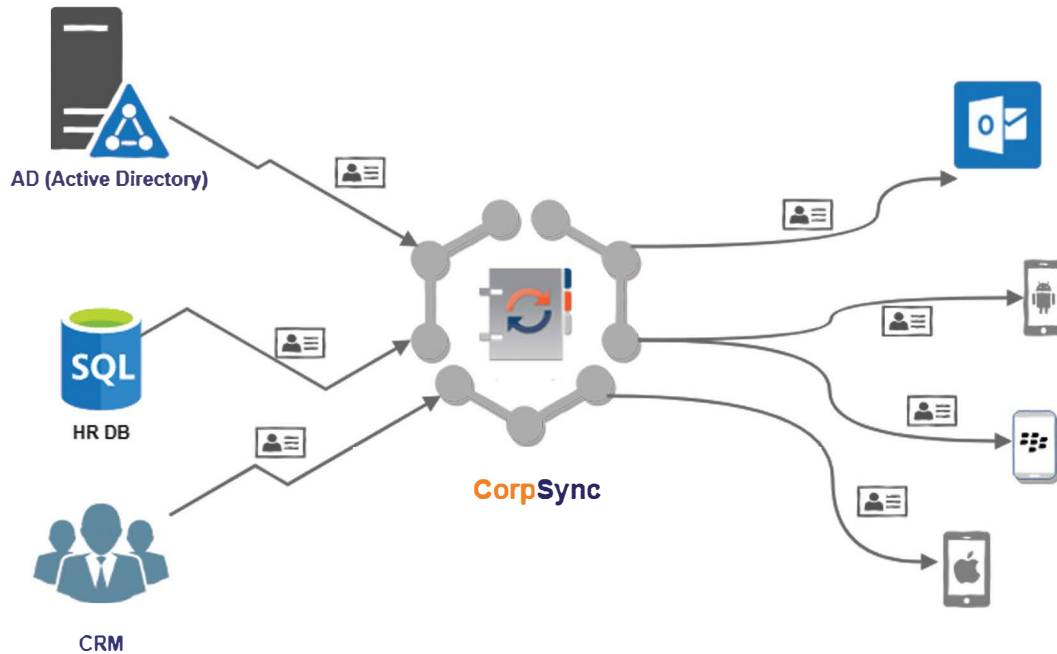

Features

- Push targeted contacts to subscribed users using subscription rules.
- Subscribed users never need add, edit, or remove corporate contacts.
- Remove content from employees who leave the firm.
- Exchange critical information with other users during network outages.
